

GUANFACINE

Helps with focus and concentration, starting and finishing tasks and moving around or making noise and shouting out

Takes 2-3 weeks to start working

Much better after 8 weeks

You might notice some other changes. Tell your doctor if you don't like how they make you feel.

You'll need checks for your heart, weight and height

Ask your doctor about stopping

Take in the evening

Tell your doctor right away if you get more angry or upset

Check up every 3 months
