

GUANFACINE

Helps with focus and concentration, starting and finishing tasks and moving around or making noise and shouting out

Takes 2-3 weeks to start working

Full effects after 8 weeks

Might get tired, appetite changes, dizziness, trouble sleeping, sore tummy, sore head or strange dreams

Health checks for the heart, weight and height

Ask the doctor about stopping

Take in the evening

Tell the doctor right away if you notice more anger or upset, or thoughts of self-harm

Check up every 3 months
